Improving Health in the San Joaquin Valley

Mobile Heal, which stands for Mobile Health and Learning, is UCSF Fresno’s mobile clinic. Through Mobile Heal, UCSF Fresno takes health care to communities where it is needed most and provides learning opportunities for future health care providers.

Mobile Heal provides no-cost medical care for underserved populations:
- Migrant farm workers
- Homeless populations
- Rural communities
- At-risk youth
- LGBTQ+ communities

Medical care includes:
- Basic health screenings
- Sports physicals for students and youth vaccinations
- Flu shots
- Needle exchanges
- HIV screenings
- Birth control distribution
- Mental health services

2019 Mobile Heal Impact

400+ community members received health care through Mobile Heal
100+ pre-health and medical students and residents volunteered for Mobile Heal

Mobile Heal health care is provided by faculty physicians at UCSF Fresno, medical residents, medical students, including those in the San Joaquin Valley Program in Medical Education (SJ V PRIME), regional college and university pre-health students and community partners.

Pre-health students gain clinical skills and experiences to be successful applicants to health professional schools. Medical students gain knowledge and clinical skills. Mobile Heal helps pre-medical and medical students make connections and develop a sense of community.

Mobile Heal was started by UCSF Fresno’s Kenny Banh, MD, assistant dean for undergraduate medical education and an emergency medicine physician at UCSF Fresno.

Mobile Heal is supported by Anthem Blue Cross, the Central Valley Community Foundation, Legacy Health Endowment, and American Ambulance.
